## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 32-47 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for closing an opening in the annulus of a disc while withdrawing an electrode from the disc, does not reasonably provide enablement for closing an opening or merely heating the disc while the electrode is in contact with, or in close proximity to, the outer surface of the disc. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 32-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 32 sets forth the voltage being sufficient to close an opening but fails to positively recite that the disc includes an opening that is actually closed. Claim 35 is set forth in a passive, in lieu of an active voice. Claims 39 and 40 recite structure without additional methodology. Claim 43 is set forth in a passive, in lieu of an active voice. Claim 44 – “the second electrode” lacks antecedent basis.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claim 47 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Sharkey et al (6,007,570). Applicant's attention is directed to column 10, lines 63-67; column 11, lines 23-27; column 15, lines 29-32; column 17, lines 32-44; and column 23, lines 5-37. The electrode is positioned in close proximity to the outer surface.
